

## Y4: 'Ancient Adventures' project knowledge organiser

- An important ancient civilisation is Ancient Egypt.
- The location of Ancient Egypt was in the area of land called the Fertile crescent.
- Fertile soil, within the Fertile Crescent, allowed civilisations to grow crops, which allowed groups to settle and develop civilisations.
- Inventing new farming techniques allowed civilisations to develop rapidly.
- The Pharaoh was at the top of the hierarchy of Ancient Egypt and ruled with absolute power; he was worshiped as a god
- Significant inventions helped ancient civilisations to solve problems and develop further.
- Ancient Egyptians mummified bodies to preserve them for the after life
- Ancient Egyptians used hieroglyphs to write and record
